DETAILED ACTION

Election/Restrictions

Claims 8-13 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 2/8/06.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3 and 7 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 5-7 of U.S. Patent No. 6,648,188. Although the conflicting claims are not identical, they are not patentably

distinct from each other because the claims in the instant application are merely written in broader terms than claim 1 of the parent.

Claims 5-6 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims of U.S. Patent No. 6,648,188 in view of 6,705,495.

6,648,188 lacks an undercut and hook shaped lip. 6,705,495 shows an undercut and hook shaped pour lip (claims 6 and 7) to remove drips from the spout and to provide a smooth flow. It would have been obvious to one of ordinary skill in the art to have modified the 6,648,188 spout with an undercut and hook shaped lip as taught by 6,705,495 to remove drips and provide a smooth flow.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McNally, Bartimes et al and Brecheisen et al were cited to show further examples of a container and closure package.
